

# Scientific Modeling

# What will we do today?

1. Build a consensus model.
2. Brainstorming: solutions to solve the problem.
3. Drawing

From the Desk of:

Greetings Scientists!

We at FRESH Org want to thank you for your excellent work so far! We brought some of your model back to our clients, the local Indiana farmers, and they wanted to thank you for your work on their behalf.

While the initial problem was to figure out what was going in Blue Pond in their community, the farmers expressed a concern over the wider impact of their activities. They had no idea what they did in their fields was possibly contributing to similar events in other communities like their own - even as far away as the Gulf of Mexico! While it is your choice what you want to include in your models, the farmers would be very interested in this information.

Thank again for all your hard work!

**Let's build our model together!**
