

Fish Autopsy Results

The scientists at Fresh Org decided to look into how some of the fish in Blue Pond died, to see if they could find any common patterns. They have put their results in the table below with predictions on how these fish most likely died:

Table: Autopsy results of ten fish taken from Blue Pond

Fish	Weight	Bones	Toxins	Blood oxygen	Likely cause of death
1	Normal	OK	Negative	Low	Suffocation
2	Normal	OK	Negative	Low	Suffocation
3	Normal	OK	Negative	Low	Suffocation
4	Normal	OK	Negative	Low	Suffocation
5	Normal	OK	Negative	Low	Suffocation
6	Normal	Broken	Negative	Low	Attacked by a turtle
7	Normal	OK	Negative	Low	Suffocation
8	Normal	OK	Negative	Low	Suffocation
9	Normal	OK	Negative	Low	Suffocation
10	Normal	OK	Negative	Low	Suffocation
